## Professional experiences

### Independant

BLOCKCHAIN DEVOPS ENGINEER

Paris

April 2022 - Present

- R&D, deployment and maintenance of a Kubernetes-based validator nodes infrastructure.
- Technologies used: TrueNAS, Kubernetes, ArgoCD. Hybrid deployments between cloud providers and on-premise.
- Major Kubernetes apps used : Istio, Grafana, Loki, Prometheus, Sealed-secrets, Ingress-hub (custom app), cert-manager, nginx ingress

### Smart-chain

Paris

DOUBLE ROLES : TECH LEAD FOR BLOCKCHAIN-BASED IP PROTECTION SERVICE | DEVOPS AND INTERNAL TRAINER

June 2021 - April 2022

- Tech lead : Audit and complete refactor of an in-house blockchain signature/IP protection service : several clients in production at my arrival, a few more corporate accounts using the new version (<https://www.musicstart.com/>)
- API development and integration in the new infrastructure (**Python, Helm, networking**) : Clients using the new version : Edith-et-Nous, SACEM with Musicstart
- DevOps : Self-training on several DevOps technologies :  
**Docker, Kubernetes, Helm, ArgoCD, S3 bucket, Hashicorp Vault...** Cloud hosting with Scaleway and OVH
- Deployment, maintenance, updates and migrations of applications in multiple clusters for testing, staging and production stages.
- Docker training Internal Docker training of Full Stack and front-end developers : **Best practices, build time and image size optimizations, security concerns...**

### Learneo

Rue de Clignancourt, Paris

IT NETWORKING INSTRUCTOR

April 2019 - June 2020

- Cisco instructor (CCNA, CCNP R&S), a couple of one-week training sessions per month, with 2-4 corporate clients at a time.
- Huawei (HCIA R&S, HCIP R&S) 2 training sessions spanning a week each, with 2-3 clients.
- MIT project instructor : networking classes for people in professional conversion. Spanning 3 months, with 15-20 trainees.  
My favorite job thus far.
- Infrastructure instructor for RTE-Orange (ICX) : one-week training for Orange employees.

### Mission Locale Orly-Choisy

Orly, France

COMPUTER SCIENCE INTERN

May 2018 - July 2018

- Development of an SMS appointment reminder app (**Java JEE - Tomcat, Google API, Vianett API**)
- Internal audit of GDPR compliance

## Skills

### IT Infrastructures, DevOps, SysAdmin and networking

- DevOps : **Kubernetes, ArgoCD, Helm, Gitlab-CI/GoCD, notions of Ansible and Hashicorp Terraform/Nomad/Consul/Vault/Packer.**
- Virtualization & containers : **Docker, Docker-compose, Proxmox, Qemu/KVM, LXC, XCP-NG ; VFIO passthrough**
- Networking protocols & IT infrastructure, enterprise networking design patterns and wireless solutions
- Other : Cryptography basics, ZFS and tiered storage, computer hardware (desktops and servers, Turing PI 2)

### Development

- Python : **Pytest, Pandas, Matplotlib, Flask, FastAPI, Django, Brownie**
- NodeJS : **VueJS 3**
- Rust : some Rust projects on my GitHub, including contributions to the **ipfs and docker libraries**
- Blockchain development : **Solidity with Remix, Truffle/Brownie**
- Other programming languages : **Java JEE, notions of Kotlin, C#, C/C++, HTML/CSS, Javascript (browser)**

### Languages

- English & French - bilingual

## Projects

---

### Home lab - mini data center

- **Home infrastructure with multiple physical servers running TrueNAS, Ubuntu Server, PFSense. Servers running IPMI.**
- Kubernetes services : **ArgoCD, Sealed-secrets, IstIO, MetalLB, OpenEBS (ZFS storage), cert-manager, loki, prometheus & promtail, nginx ingress controller**
- Other solutions studied : **Hashicorp Terraform, Vault, Consul, Nomad.**
- Previously used : **Proxmox, NGINX reverse proxy, Windows server, PRTG, linux containers (LXC)**

### Custom DevOps tools (github links)

- [github.com/guillhe/K8-ingress-hub](https://github.com/guillhe/K8-ingress-hub) : **Python, VueJS** Kubernetes ingress dashboard. Can be ran locally or deployed onto a kubernetes cluster.
- [github.com/guillhe/docker-dev-env-generator](https://github.com/guillhe/docker-dev-env-generator) : Simple **Rust** utility that will bootstrap a container-based development environment
- [github.com/guillhe/kubernetes-sealed-secrets-key-archiver](https://github.com/guillhe/kubernetes-sealed-secrets-key-archiver) : Sealed-secrets keys archiver (out-of-date)
- [github.com/guillhe/argocd-kustomize-helm-cmp](https://github.com/guillhe/argocd-kustomize-helm-cmp) : ArgoCD plugin to combine Kustomize and Helm deployments

### Design of applications deployment strategies

- Design of storage and compute solutions of multiple applications for several platforms.
- Blockchain nodes : **Q-blockchain, Avail, Tezos, Presearch, Geth-based nodes...**
- Platforms used : **Docker/Docker-compose, Kubernetes, Helm, ArgoCD**

### DeSign - Decentralized Signature

- Decentralized application capable of "simple" signatures (according to EIDAS regulation) on EVM compatible blockchains.
- Client application, written in **Java**
- <https://github.com/guillhe/DeSign>

### Other smaller projects

- Linux VFIO GPU passthrough for a Windows gaming VM
- Playing around with Hashicorp Nomad [github.com/guillhe/nomad-testing](https://github.com/guillhe/nomad-testing)
- RaspberryPI-based security camera
- Linux daemon to automatically turn on my home PC when I get home (detecting my phone's mac address on my local network and sending a Wake-on-Lan packet)

## Trainings and Education

---

### Alyra online school

#### BLOCKCHAIN DEVELOPPER

- Blockchain basic concepts (PoW/PoS/PoA, mining, limitations and use cases)
- Solidity programming for EVM Smart Contracts
- DApps development with Truffle/Brownie, Django front-end (python) & client-side Javascript (web3.js)
- Final project : DeSign, Decentralized electronic signature with Fawzi Banhalima ([github.com/guillhe/DeSign](https://github.com/guillhe/DeSign))

Paris, France

October 2020 - May 2021

### Learneo

#### MIIT TRAINING

- CCNA certification (février 2019)
- IINS certification (2020)
- ITIL concepts

Paris, France

January 2019 - April 2019

### IUT Paris Descartes

#### COMPUTER SCIENCE DEGREE (DUT)

- Programming : Java JEE (jsp), C, C++, HTML/CSS, PHP, SQL
- Networking basics (IPv4, NAT/PAT, addresses MAC)
- Final project : Web service to implement AI-based FaQs for clients.

Paris, France

July 2018

## Certifications

---

### Blockchain Developer certification (with Alyra)

**CCSI - Certified Cisco Systems Instructor**

**CCNA - Cisco Certified Network Associate**

Expired February 2021

Expires June 2023
